I. INTRODUCTION

This report provides selected tabular summaries of data from the U.S. decennial census. The primary dataset used in this analysis is the Census 2000 “redistricting” data file – also known as the “PL 94-171” data file – produced by the U.S. Census Bureau in March 2001, also known as the “PL 94-171” data file (see explanation of these terms in II, below.)

The geographic focus for this report is the nine-county San Francisco Bay Area which includes the counties of Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Solano and Sonoma. Data is reported at the region, county, place and MTC’s 34 superdistricts level. The term “superdistrict” is used to denote a sub-county area used in MTC’s transportation planning analyses. The term “place” includes both incorporated cities and unincorporated areas known as census designated places (CDP).

Historical data (1860-2000) on total population is provided at the regional, county and place level. Historical data on population by race and ethnicity is provided at the regional and county level for the years 1980 through 2000.

This data summary includes a set of main tables and appendix tables. The main tables, Tables 1 through 11, provide a broad overview of Census 2000 PL 94-171 data for the San Francisco Bay Area.

Appendix A includes tables on Bay Area places. Historical (1860-2000) place-level populations are included, as well as different sort orders on Census 2000 place-level data.

Appendix B includes one summary table on Bay Area county population by race and by Hispanic/Latino status.

Appendix C includes tables ranking Bay Area place, county and regional total population figures to those of other areas of the United States.

Appendix D includes tables summarizing population characteristics by population density levels. Population density levels are based on block group-level calculations of persons per square mile.

Appendix “E” includes tables summarizing population characteristics by MTC’s 34 superdistricts.

Maps showing the location of Bay Area cities and census designated places are included in Figures 1 through 9.

II. PUBLIC LAW 94-171

In December 1975 the U.S. 94th Congress passed a bill to “*establish a plan for cooperation between the Secretary of Commerce and the States to provide them with the desired census information for the apportionment or districting of the legislative body or bodies of those States as expeditiously as possible after the decennial census*” This bill became Public Law 94-171 on Dec. 23, 1975 and amended section 141 of Title 13, United States Code, relating to the conduct of the decennial census. This new law required that the Census Bureau prepare tabulations of

population for every state and that they *"be completed, reported and transmitted to each respective State within one year after the decennial census date."*

These decennial census data files were thereafter known as the "PL 94-171" or "redistricting" data files, and have been produced for the 1980, 1990 and 2000 decennial censuses.

Census 2000 PL 94-171 data for California was released March 29, 2001.

The Census 2000 version of the PL 94-171 file includes four data tables:

- PL1. Total Population by Race (71 data cells)
- PL2. Total Population by Hispanic/Latino, Non-Hispanic/Latino by Race (73 data cells)
- PL3. Total Population, 18 years and over, by Race (71 data cells)
- PL4. Total Population, 18 years and over, by Hispanic/Latino, Non-Hispanic/Latino by Race (73 data cells)

Census 2000 includes two basic questionnaires: a "short form" with questions about housing and population asked of 100 percent of the U.S. population; and a "long form" with additional questions asked of approximately one in six U.S. residents (or approximately one in eight metropolitan area residents.) Data for the PL 94-171 data file is based on "short form" population data, only.

Data on "short form" housing and household information was released summer 2001 as part of the "Demographic Profile #1" (DP-1) and "Summary File #1" (SF-1) data releases. Data on "long form" or "sample" data will be released beginning early 2002.

III. GEOGRAPHIC LEVELS

PL 94-171 data is available down to the census block level, and also includes intermediate geographic "summary levels" including, county, place, census tract and block group.

Census tracts are small, relatively permanent geographic entities within counties. Generally, census tracts have between 2,500 and 8,000 residents and follow visible features. A census block group is a cluster of census blocks having the same first digit of their four-digit identifying numbers within a census tract. Block groups generally contain between 600 and 3,000 people, with an optimal size of 1,500 people. Census blocks are the smallest census geography and are typically equivalent to city blocks.

The term "summary level" is used to identify computer records at the various levels of census geography, i.e., blocks, block groups, census tracts, places, counties, etc.

The following table tallies, by Bay Area county, the number of census blocks, block groups, census tracts, places and "census travel analysis zones" included in Census 2000 data files. Census travel analysis zones (CTAZ) for the Bay Area were defined by MTC, and are geographic areas that will be used to summarize census "journey-to-work" data in 2002/2003.

Census 2000 Geographic Levels, San Francisco Bay Area

County	Places	Census Tracts	Block Groups	Blocks	Census Travel Analysis Zones
Alameda	20	321	983	14,877	757
Contra Costa	41	168	568	10,309	529
Marin	27	51	152	3,414	138
Napa	7	27	91	1,882	108
San Francisco	1	176	575	5,779	733
San Mateo	28	155	446	8,253	477
Santa Clara	27	341	1,010	18,517	856
Solano	9	80	241	4,795	219
Sonoma	23	86	356	8,403	252
Bay Area	183	1,405	4,422	76,249	4,069

IV. DISCUSSION OF RESULTS

A. U.S., California and the San Francisco Bay Area (Table 1)

The nine-county San Francisco Bay Area has a year 2000 population of 6,783,760 persons. This compares to the 33,871,648 residents of California and a United States population of 281,426,906 (Table 1). The Bay Area comprises 2.4 percent of the U.S. total population. In terms of racial/ethnicity groups with the high representation in the Bay Area, the Bay Area comprises 12.6 percent of the U.S. Asian population; 9.5 percent of the U.S. native Hawaiian/other Pacific Islander population; and 3.7 percent of the U.S. Hispanic/Latino population.

The share of total population by race/ethnicity for the United States, California and the San Francisco Bay Area is included in the lower portion of Table 1. The white, non-Hispanic/Latino share of the U.S. population is 69.1 percent; in California, 46.7 percent; and in the Bay Area, 50.0 percent. The most noteworthy differences between the U.S. and Bay Area share of population by race/ethnicity is for the Asian segment (alone, not in combination with other races.) The U.S. Asian share of population (3.6 percent) is several magnitudes smaller than the Bay Area Asian share (18.8 percent). The California Asian share (10.8 percent) is significantly less than the Bay Area's, but significantly greater than that of the U.S.

The Hispanic or Latino share of Bay Area population (19.4 percent) is also significantly higher than the U.S. Hispanic/Latino share (12.5 percent). The California Hispanic/Latino share of total population, at 32.4 percent, is significantly higher than that of the U.S. and the Bay Area. One in eight persons in the United States reside in California. This compares to one in three U.S. Hispanics/Latinos residing in California.

The black or African American share of Bay Area population (7.3 percent) is slightly higher than the California share of black/African American population (6.4 percent) and moderately less than the U.S. share (12.1 percent.)

New in Census 2000 is the category "two or more races," in which persons are allowed to check off one or more racial/ethnic categories on their census questionnaire. The Bay Area share of two-or-more race persons (3.3 percent) is double that of the United States as a whole (1.6

percent) and slightly higher than the two-or-more race share for the State of California (2.7 percent).

B. Bay Area Counties (Tables 2-5)

Year 2000 total population by race/ethnicity by Bay Area county is summarized in Table 2. This table combines the Hispanic/Latino population by race into a single "Hispanic or Latino" group. The "Non-Hispanic" racial categories are reported separately for: white, black or African American, American Indian or Alaskan Native, Asian, Native Hawaiian or Pacific Islander, other race, and two or more races.

Santa Clara County is the largest Bay Area county in terms of total population, with 1,682,585 residents in the year 2000. Santa Clara County is followed by Alameda County (1,443,741 residents), Contra Costa County (948,816 residents) and San Francisco County (776,733 residents). The smallest Bay Area counties are Napa County (population of 124,279); Marin (247,289 residents) and Solano (394,542 residents).

For the nine Bay Area counties, Santa Clara County has the largest number of Hispanic/Latino, white and Asian persons. Alameda County has the largest number of black/African American, American Indian, other race and two-or-more race persons. San Mateo County has the largest number of Native Hawaiian or Pacific Islander persons.

The county-level share of white (non-Hispanic) population ranges from a low of 40.9 percent of Alameda County population to a high of 78.6 percent of Marin County's population. Other Bay Area counties with low white population shares include San Francisco (43.6 percent), Santa Clara (44.2 percent), and Solano County (49.2 percent).

The county-level shares of Hispanic or Latino population range from a low of 11.1 percent of Marin County's population to a high of 24.0 percent of Santa Clara County's population. Other Bay Area counties with high Hispanic/Latino population shares include Napa (23.7 percent) and San Mateo (21.9 percent).

County-level shares of Asian population range from 2.9 percent of Napa County population to 30.7 percent of San Francisco's population. Other counties with high Asian population shares include Santa Clara (25.4 percent), Alameda (20.3 percent) and San Mateo (19.8 percent).

County-level shares of black/African American population range from 1.2 percent in Napa County to 14.6 percent in both Alameda and Solano counties. Other Bay Area counties with a high black/African American population shares include Contra Costa (9.1 percent) and San Francisco (7.6 percent).

County-level shares of Native Hawaiian or Pacific Islander population range from 0.13 percent in Marin to 1.29 percent in San Mateo County. Solano County (0.72 percent) and San Francisco (0.59 percent) have relatively high shares of Native Hawaiian persons.

The American Indian population shares range from 0.22 percent in San Mateo to 0.76 percent in Sonoma County.

Before moving ahead to an analysis of the data in Tables 3 and 4, it is important to discuss changes in race/ethnicity questions asked in U.S. decennial censuses.

Historical comparison of race/ethnicity trends is challenging due to new data on two-or-more race (i.e., multiracial) persons. In previous censuses, respondents were required to check off only one race, and to check off whether the person was or wasn't Hispanic/Latino. In Census 2000, the Hispanic or Latino question is the same as in previous censuses (1980-1990), though the Hispanic/Latino status question is now asked before the race question.

"Bridging" methodologies to make Census 2000 more like previous censuses have been researched by the U.S. Office of Management and Budget (OMB) and various demographers. However, there is no preferred bridging methodology to apply to make these conversions, and none was used in preparing this data summary. It should be stated that the two-or-more race category is a valid and appropriate category for reporting population characteristics. Any attempt to drop the two-or-more race data by re-allocating these persons to older census categories should only be done for historical comparison purposes.

One of the options expressed in this data summary is to represent the population by race data as low to high values for each group. For example, the Bay Area black/African American population ranges from a low of 497,205 persons (7.3 percent of Bay Area population) for the "black or African American, alone," to a high of 543,934 persons (8.0 percent of Bay Area population) for the "black or African American alone or in combination with other races" group. These population shares, at the county and Bay Area regional level, are included at the end of Table 5.

Total population by Bay Area county, by race/ethnicity, 1980 to 2000, is shown in Table 3. Share of total population by county by race/ethnicity is summarized in Table 4. Between 1980 and 2000, the Bay Area gained over 1.6 million new residents, increasing from 5,180,000 persons in 1980 to 6,784,000 persons in 2000. This is equivalent to a 1.4 percent per year growth rate, or 31 percent total growth over 20 years.

The fastest growing racial/ethnic group in the Bay Area, both in terms of absolute numbers and percentage growth, is the Asian/Native Hawaiian/Pacific Islander population. The Bay Area Asian/Pacific Islander population increased from 438,000 persons in 1980 to over 1.3 million persons by 2000, a tripling of the Asian/Pacific Islander population (at a rate of 5.6 percent per year).

The Bay Area Hispanic/Latino population was the second fastest growing group over the 1980 to 2000 period, increasing from 633,000 in 1980 to 1.3 million in 2000. This represents a 108 percent increase over 20 years (or 3.7 percent per year.)

The Bay Area black/African American population has shown modest increases over the past twenty years. The 1980 population of 459,000 has increased to about 497,000 in 2000 (black or African American, alone) to a high value of 544,000 (black or African American, alone or in combination with other races.) On the other hand, the black/African American share of the Bay Area's total population has declined from 8.9 percent in 1980 to 7.3 to 8.0 percent in 2000. (The 7.3 percent represents the black/African American alone share; 8.0 percent represents "alone or in combination.")

The Bay Area American Indian/Alaskan Native population was fairly constant at about 30,000 persons in both the 1980 and 1990 decennial censuses. Census 2000 values for Bay Area American Indians range from a low of 24,000 (American Indian/Alaskan Native, alone) to a high of 66,000 (American Indian/Alaskan Native, alone or in combination with other races.) Without further testing and implementation of racial “bridging” methods, it is impossible to clearly state that the Bay Area’s American Indian population has increased, decreased or remained relatively stable between 1980 and 2000.

The Bay Area’s white, non-Hispanic population decreased in total number and share between 1980 and 2000. There were 3.6 million white, non-Hispanic Bay Area residents in 1980. By 2000 this number ranges from 3.4 million (non-Hispanic white, alone) to 3.5 million (non-Hispanic white, alone or in combination with other races.)

What is evident at a county-level is a steady increase in the Asian/pacific islander and Hispanic/Latino shares of total population between 1980, 1990 and 2000. Some of the most notable increases are the Asian/Pacific Islander share in Santa Clara County (7.4 percent in 1980 increasing to 25.7 percent in 2000), San Francisco (21.2 percent in 1980 increasing to 31.1 percent in 2000), Alameda (7.6 percent in 1980 increasing to 20.9 percent in 2000) and San Mateo County (9.5 percent in 1980 increasing to 21.1 percent in 2000); and the Hispanic/Latino share in Napa County (8.7 percent in 1980 increasing to 23.7 percent in 2000) and Sonoma County (6.9 percent in 1980 increasing to 17.3 percent in 2000).

A detailed table of the Non-Hispanic/Latino Two-or-More Race Population, by Bay Area county, is summarized in Table 5. This table provides the detailed combinations for persons of one race (alone); persons of two races; persons of three races; persons of four races; persons of five races; and persons of six races. Again, this table is for the non-Hispanic/Latino segment of the population. In terms of Bay Area totals, the non-Hispanic Bay Area population can be summarized as follows:

San Francisco Bay Area, Year 2000 Non-Hispanic/Latino Total Population by Number of Races Reported

Number of Races Reported	Total Population	Share of Total Population
One race (alone)	5,244,748	95.9%
Two races	206,271	3.8%
Three races	15,876	0.3%
Four races	1,396	< 0.1%
Five races	286	< 0.1%
Six races	8	< 0.1%
TOTAL	5,468,585	100.0%

C. Racial/Ethnic Diversity in the San Francisco Bay Area (Table 6)

One of the most interesting themes emerging from analysis of Census 2000 data is the increasing racial and ethnic diversity in the United States in general and the San Francisco Bay Area in particular. This data summary includes a “diversity index” that ranges from 0.0 to 1.0. A diversity index of 0.0 implies the least diversity, that is, only one group is represented in the

population. A diversity index of 1.0 implies the most diversity, that is, all groups are equally represented in the population.

A detailed endnote on page 18 discusses the background and calculation of the diversity index used in this data summary.ⁱ

At a regional level, the Bay Area has steadily increased from a diversity index of 0.605 in 1980 to 0.809 in 2000 (Table 6).

At a county level, year 2000 diversity indices range from 0.485 in Marin County to 0.889 in Alameda County. The other most diverse Bay Area counties include Solano (0.844), San Francisco (0.818) and Santa Clara (0.786).

San Francisco was the most racially/ethnically diverse Bay Area county in both 1980 (0.760) and 1990 (0.780).

D. Historical Population Growth in the San Francisco Bay Area, 1860-2000 (Table 7)

The first U.S. decennial census from which full data for the San Francisco Bay Area is available was conducted in 1860. The 1850 U.S. census information was partially destroyed by fire in the 1800s. Data on total population by Bay Area county, 1860 to 2000, is shown in Table 7.

San Francisco was the largest Bay Area county in terms of total population between 1860 and 1950. This distinction was assumed by Alameda County in 1960 and 1970. Santa Clara County has been the largest Bay Area county since the 1980 Census.

In 1900, 52 percent of all Bay Area residents lived in San Francisco; by 2000, San Francisco comprised 11 percent of the Bay Area's population. In 1900, just 9 percent of Bay Area residents lived in Santa Clara County. By 2000, over 25 percent of Bay Area residents lived in that county.

The smallest total population in the Bay Area was recorded in San Mateo County between 1860 and 1900, and Napa County in every census since 1910.

In terms of population growth, the decade with the largest absolute increase was the 1960s, with the region gaining 991,000 new residents between 1960 and 1970. This was followed by the 1950s (958,000 new residents), the 1940s (947,000 new residents) and the 1980s (844,000 new residents). The Bay Area added 760,000 new residents between 1990 and 2000.

At a county level, the most significant increase in total population over the span of a decade was the 423,000 additional residents added to Santa Clara County in the 1960s, boosting the total population from 642,000 residents in 1960 to nearly 1.1 million residents by 1970. The next largest increase was a 352,000 increase in Santa Clara County between 1950 and 1960.

The most significant county level decrease in total population was the decline in San Francisco County population between 1950 (peaking at 775,000 population) to the modern historic low of

679,000 persons by 1980. In 2000, however, San Francisco City and County was at a historic census-year¹ high in terms of total population, with a total population of 777,000 persons.

E. Change in Voting Age and Total Population by County, 1980-2000 (Table 8)

Tables PL3 and PL4 of the Census 2000 PL 94-171 data files includes tables on voting age (18-and-over) population by race/ethnicity. A summary of the Bay Area voting age population by county is included in Table 8. The total population less than 18 years of age is a simple calculation of total population less voting-age population.

The regional share of voting-age relative to minor population has remained fairly stable between 1980, decreasing from 75.0 percent of total voting-age population in 1980 to 76.4 percent in 2000.

The “youngest” county, in terms of greatest share of persons less than 18 years of age, is Solano County, at 28.3 percent. Other “young age” counties include Contra Costa (26.5 percent younger than 18 years of age) and Santa Clara County (24.7 percent younger than 18 years of age).

The “oldest” county, in terms of lowest share of persons less than 18 years of age, is San Francisco County, at 14.5 percent. Other “older” counties include Marin (20.3 percent younger than 18 years of age) and San Mateo County (22.9 percent younger than 18 years of age).

Detailed data on population by age and by sex was released as part of Census 2000 “Summary File #1” (SF-1) in summer 2001.

F. Population in Bay Area Places (Tables 9-11)

The three tables in this set include the 10 largest cities in the San Francisco Bay Area between 1960 and 2000 (Table 9), total population by race and ethnicity by all 183 Bay Area places (Table 10) and the share of total population by race and ethnicity by all 183 Bay Area places (Table 11). Historical total population by Bay Area places, 1860 to 2000, is included in Appendix Table A.4.

The term “places” includes both incorporated cities and towns, and unincorporated census designated places or CDPs. The following table is a tally of the number of incorporated cities/towns and unincorporated places by Bay Area county:

1) Note, however, that the historic population high for San Francisco may have been in the mid-to-late 1940s. The state of California estimated a 1947 population of 785,000 for San Francisco, cited in the 1949 report “A Study of Street and Highway Traffic in the San Francisco Bay Metropolitan Area.” This 1947 population statistic was revised to 775,900 by the State Department of Finance, probably after 1950 census data was available. <<http://www.dof.ca.gov/html/Demograp/147-69.htm>>

County	Incorporated Cities/Towns	Unincorporated Census Designated Places (CDP)	Total Places
Alameda	14	6	20
Contra Costa	19	22	41
Marin	11	16	27
Napa	5	2	7
San Francisco	1	0	1
San Mateo	20	8	28
Santa Clara	15	12	27
Solano	7	2	9
Sonoma	9	14	23
Bay Area	101	82	183

New cities in the Bay Area incorporated over the 1990s include the city of Oakley, incorporated July 1, 1999. Relative to the 1990 census, there are 20 new census designated places in the 2000 census, including:

1. Fairview, Alameda County
2. Sunol, Alameda County
3. Byron, Contra Costa County
4. Clyde, Contra Costa County
5. Knightsen, Contra Costa County
6. Mountain View, Contra Costa County
7. Rollingwood, Contra Costa County
8. Waldon, Contra Costa County
9. Black Point – Green Point, Marin County
10. Dillon Beach, Marin County
11. Muir Beach, Marin County
12. San Geronimo, Marin County
13. Stinson Beach, Marin County
14. Highlands-Baywood Park, San Mateo County
15. Buena Vista, Santa Clara County
16. Burbank, Santa Clara County
17. Fruitdale, Santa Clara County
18. Seven Trees, Santa Clara County
19. Sunol-Midtown, Santa Clara County
20. Green Valley, Solano County

Note that the 20 census designated places are distinct entities from cities with the same name, for example, Mountain View city in Santa Clara County and Mountain View CDP in Contra Costa County; Burbank CDP in Santa Clara County and the city of Burbank in Los Angeles County.

A description of the CDP development process is included as endnote (ii) on page 19.

In terms of total population the largest city in the San Francisco Bay Area is San Jose with a year 2000 population of 895,000 residents. San Francisco is the second largest city with 777,000 residents and Oakland is the third largest Bay Area city with a 2000 population of 399,000 persons (Table 9).

San Jose became the largest Bay Area city after the 1990 Census, gaining 153,000 new residents between 1980 and 1990.

San Francisco was the largest Bay Area city between the 1860 and 1980 censuses, and the second largest (after San Jose) from 1990 to the present.

Oakland was the second largest Bay Area city between 1870 and 1960, and dropped to third largest city (after San Francisco and San Jose) from 1970 to the current census.

Fremont, in southern Alameda County, has been the fourth largest Bay Area city since the 1980 census. Fremont, with a current population of 203,000 persons, first exceeded 100,000 in population in the 1970 census.

Santa Rosa is the largest city in the North Bay, and the fifth largest Bay Area community, with a 2000 population of 148,000. Santa Rosa first exceeded 100,000 in population in the 1990 census.

Berkeley was the third largest Bay Area city between 1910 and 1950, even larger than San Jose. In 1960, San Jose surpassed Berkeley as the third largest Bay Area city, with Berkeley retaining the fourth largest city status in 1960 through 1970. Berkeley's population peaked at 117,000 persons in 1970, decreasing to a steady 103,000 between 1980 and 2000. In 1980, Berkeley dropped to seventh largest Bay Area city, surpassed by Fremont, Sunnyvale and Concord. By 1990, Berkeley had dropped to tenth largest Bay Area city, where it remains today.

The following table ranks the top 10 Bay Area cities in terms of total population, 1960 to 2000:

Rank	2000	1990	1980	1970	1960
1	San Jose	San Jose	San Francisco	San Francisco	San Francisco
2	San Francisco	San Francisco	San Jose	San Jose	San Jose
3	Oakland	Oakland	Oakland	Oakland	Oakland
4	Fremont	Fremont	Fremont	Berkeley	Berkeley
5	Santa Rosa	Sunnyvale	Sunnyvale	Fremont	Hayward
6	Hayward	Santa Rosa	Concord	Sunnyvale	Richmond
7	Sunnyvale	Hayward	Berkeley	Hayward	San Mateo
8	Concord	Concord	Hayward	Santa Clara	San Leandro
9	Vallejo	Vallejo	Santa Clara	Concord	Alameda
10	Berkeley	Berkeley	Santa Rosa	Richmond	Vallejo

Table 10 includes selected Census 2000 PL 94-171 data for Bay Area places, alphabetically sorted by county and then by place name. Two columns of data are the "FIPS code" (Federal Identification Planning System) for each county and place in the Bay Area. Data in these tables includes total population, Hispanic or Latino population of any race, and breakdowns of the non-Hispanic population by race. The abbreviations are included in Table 10, 11 and the Appendix A tables, as follows:

- White = white alone, non-Hispanic
- Hispanic = Hispanic or Latino
- Black = black or African American alone, non-Hispanic
- Amer Ind = American Indian or Alaskan Native, alone, non-Hispanic
- Asian = Asian alone, non-Hispanic
- Hawaii/PI = Native Hawaiian or Pacific Islander, alone, non-Hispanic
- Other = other race alone, non-Hispanic
- Multi = two-or-more races, non-Hispanic
- Minority = Total population less white non-Hispanic

Additional data included in Table 10 are the total minority population, the percent minority population, land area in square miles, and population density (total population divided by land area.)

Table 11 presents the share of population by race/ethnicity data in the same county and place name alphabetical sort order as in Table 10.

G. Supplementary Place-Level Tables (Appendix Tables A.1 – A.6)

Of the four tables included in Appendix A the first two are re-sorted versions of Table 10, total population by race/ethnicity by Bay Area places. Appendix Table A.1 is for Bay Area places in an alphabetical sort (not by county). Appendix Table A.2 is for Bay Area places in total population rank order.

Appendix Table A.3 presents a ranking of Bay Area places by the diversity index.

The most racially/ethnically diverse community in the San Francisco Bay Area is Vallejo, with a diversity index of 0.932. Vallejo is 16 percent Hispanic/Latino, 23 percent black/African American, 30 percent white, and 24 percent Asian, and 7 percent other categories combined (American Indian, Hawaiian/Pacific Islander, other races, and two-or-more races.)

The other most diverse communities in the Bay Area are Ashland (an unincorporated community between Hayward and San Leandro in central Alameda County) (with a 0.923 diversity index), Suisun City in Solano County (0.918), Oakland (0.906), and Pittsburg in eastern Contra Costa County (0.906). San Francisco is the 22nd most diverse community in the region (0.818) followed by San Jose (0.806).

The least diverse communities are in Marin and Sonoma counties. They include Belvedere in Marin County (0.158), the town of Ross in Marin County (0.180), the community of Temelec in southern Sonoma County (0.180) and Tomales along the Sonoma coast (0.181). All of these communities are over 94 percent white, non-Hispanic race/ethnicity. In terms of medium to large cities of greater than 50,000 population, Walnut Creek in central Contra Costa County (population 64,300) is the least diverse community (0.445 diversity index, 81 percent white, non-Hispanic share.)

Appendix Table A.3 can also be re-sorted to examine communities with the highest shares of the different racial/ethnic groups.

The communities with the highest share of Hispanic/Latino population are unincorporated communities in San Mateo and Santa Clara counties, including North Fair Oaks (San Mateo County, 69.6 percent Hispanic/Latino), Seven Trees (Santa Clara County, 68.0 percent), Alum Rock (Santa Clara County, 67.0 percent), Buena Vista (Santa Clara County, 65.9 percent) and Sunol-Midtown (Santa Clara County, 64.3 percent Hispanic/Latino). The communities of Seven Trees, Buena Vista and Sunol-Midtown are unincorporated areas nestled completely within San Jose city limits.

Bay Area cities with the highest Hispanic/Latino shares of total population include: East Palo Alto (58.8 percent Hispanic/Latino), Gilroy (53.8 percent Hispanic/Latino) and San Pablo (44.6 percent Hispanic/Latino).

The communities with the highest share of black/African American population are Richmond (35.6 percent), Oakland (35.1 percent), Vallejo (23.3 percent) and East Palo Alto (22.5 percent).

The communities with the highest share of Asian population are Daly City (51.5 percent), Milpitas (50.3 percent), Cupertino (44.3 percent), Union City (43.0 percent), Hercules (42.4 percent) and Fremont (36.8 percent). The city of San Francisco ranks 10th in the Bay Area in terms of highest shares of Asian population at 30.7 percent.

The communities with the highest share of Native Hawaiian or Pacific Islander population include East Palo Alto (7.5 percent), San Bruno (2.8 percent) and Hayward (1.8 percent).

Roseland, an unincorporated county island within Santa Rosa city limits has the highest share of American Indian/Alaskan Natives among Bay Area communities, at 1.9 percent. Cloverdale (northern Sonoma County) has the highest share of American Indian/Alaskan Natives among Bay Area incorporated cities, at 1.2 percent.

The communities with the highest share of multiracial (two-or-more) race population include Suisun City (5.8 percent two-or-more race) and Fairfield (5.2 percent two-or-more race).

The fourth table in this set (Appendix A.4) is the historical place-level population for all Bay Area communities between 1860 and 2000. This table was adapted from a statewide database created by the California State Department of Finance, from their web page at:

<http://www.dof.ca.gov/html/Demograp/histtext.htm>

The final two tables in this set (Appendix A.5 and A.6) include the Census 2000 data on population age 18 and over, and population less than 18 years of age, by Bay Area place. Data is in alphabetical sort order in Table A.5. Bay Area places ranked by share of population less than 18 years of age is provided in Table A.6.

The “youngest” Bay Area communities, in terms of share of population less than 18 years of age, are Byron in eastern Contra Costa County (35.0 percent), East Palo Alto (also 35.0 percent), Oakley in eastern Contra Costa County (34.5 percent), Rollingwood in western Contra Costa County (33.3 percent), Bay Point in eastern Contra Costa County (33.2 percent), Brentwood in eastern Contra Costa (32.8 percent), and Gilroy (32.6 percent).

The “oldest” Bay Area communities, in terms of share of population less than 18 years of age, are Temelec in Sonoma Valley (0.2 percent), Stanford (7.2 percent), Sausalito (7.4 percent), Waldon (9.5 percent), and Yountville (11.1 percent). Those interested in knowing “Where’s Waldon?” (as well as all cities and census designated places) may refer to Figures 1 through 8 at the end of this data summary.

H. Supplementary County-Level Tables (Appendix Tables B.1)

The purpose of Appendix Table B.1 is to provide race details for Hispanic/Latinos and non-Hispanic/Latinos. This data shows that the plurality of the 1.3 million Bay Area Hispanic/Latinos

checked “some other race” as their race (609,000), with the next largest checking “white” as their race (549,000). The third largest race category for Bay Area Hispanic/Latinos is “two or more races” (110,000).

The following table summarizes the regional Hispanic/Latino share of each of the seven racial groups:

Race	Hispanic/Latino	Non-Hispanic/Latino	Total	% Hispanic/Latino
White	549,483	3,392,204	3,941,687	13.9%
Black/African American	13,879	497,205	511,084	2.7%
American Indian or Alaskan Native	18,796	24,733	43,529	43.2%
Asian	11,334	1,278,515	1,289,849	0.08%
Native Hawaiian and Other Pacific Islander	2,677	33,640	36,317	7.4%
Some Other Race	608,553	18,451	626,004	97.2%
Two-or-More Races	110,453	223,837	334,290	33.0%
Total	1,315,175	5,468,585	6,783,760	19.4%

I. Ranking of Places, Counties and Metropolitan Areas in the United States (Appendix Tables C.1 – C.7)

Appendix C includes seven tables showing ranking of U.S. cities, counties and metropolitan areas in terms of total population and population by race/ethnicity.

San Jose is the 11th largest city in the United States with a population of nearly 895,000 persons (Table C.1.) San Francisco is the 13th largest city in the United State with a population of nearly 777,000 persons. New York is the largest U.S. city with a population of 8.0 million persons. Los Angeles is the largest city in California and second largest city in the United States with a population of 3.69 million persons. San Diego is the second largest city in California, and seventh in the United States with a population of 1.22 million. San Jose and San Francisco are the third and fourth largest California cities.

San Jose is also the 11th largest Hispanic/Latino community in the United States with a Hispanic/Latino population of nearly 270,000 persons (Table C.2.) There are 32 places in the United States (including Puerto Rico) with Hispanic/Latino populations exceeding 100,000 persons. New York (2.16 million Latinos) and Los Angeles (1.7 million Latinos) have the largest U.S. Latino population. San Francisco ranks 32nd in the U.S. in Hispanic/Latino population with 109,504 persons. The Hispanic/Latino share of total population in these high Latino population communities ranges from 8.5 percent in Philadelphia to 98.6 percent in Bayamón, Puerto Rico.

San Jose is the third largest Asian community in the United States with an Asian population of 240 thousand persons (Table C.3.) San Jose follows New York City (787,000 Asian population) and Los Angeles (369,000 Asian population.) San Francisco is the fourth largest Asian community with a population of nearly 240,000 Asian persons.

There are 34 places in the United States with an Asian population greater than 25,000 persons. Nine of these 34 U.S. places are in the San Francisco Bay Area, including: San Jose (third, with a population of 240,400 Asians), San Francisco (fourth, with 239,600 Asians), Fremont (ninth, with 75,200 Asians), Oakland (13th, with 60,900 Asians), Daly City (15th, with 52,500 Asians), Sunnyvale (21st, with 42,500 Asians), Santa Clara (30th, with 29,966 Asians), Vallejo (32nd, with 28,200 Asians) and Hayward (33rd, with 26,600 Asians). The Asian share of total population ranges from a low of 2.0 percent in Phoenix, Arizona, to 55.9 percent in Honolulu, Hawaii. Daly City ranks second in terms of Asian share of total population at 50.7 percent.

In terms of U.S. places with large black/African American populations, Oakland is the leading Bay Area community with 142,000 black/African Americans, ranking 24th among U.S. places (Table C.4.)

Five Bay Area communities are among the top 28 U.S. places in terms of number of Hawaiian / Pacific Islander persons (Table C.5.) Honolulu, Hawaii, is the largest U.S. places with over 25,000 persons of Hawaiian / Pacific Islander race. Bay Area places include San Francisco (seventh, with 3,844 Hawaiian/Pacific Islanders), San Jose (eighth, with 3,574 Hawaiian/Pacific Islanders), Hayward (12th, with 2,679 Hawaiian/Pacific Islanders), Oakland (15th, with 2,002 Hawaiian/Pacific Islanders) and Vallejo (21st, with 1,276 Hawaiian/Pacific Islanders).

Thirty-four counties in the United States have a population greater than 1.0 million persons (Table C.6.) Los Angeles County is the largest county in the U.S. with a population of 9.5 million persons. Santa Clara County is the 14th largest county in the U.S. (and fifth largest in California after L.A., Orange, San Diego and San Bernardino counties) with a population of nearly 1.7 million persons. Alameda County is the 21st largest county in the U.S. (and sixth largest in California) with a population of 1.44 million persons.

The greater San Francisco Bay Area “Consolidated Metropolitan Statistical Area”² is the fifth largest metropolitan area in the United States with a population of over 7 million persons (Table C.7.) Note that the San Francisco CMSA includes Santa Cruz County. Also note that the Washington, D.C. and Baltimore metropolitan areas are now considered as one consolidated metropolitan area, making that region the fourth largest in the country with a population of 7.6 million. Excluding Santa Cruz County, and splitting Washington and Baltimore into two regions, would make the San Francisco Bay Area still the fourth largest metropolitan areas in the country, after New York, Los Angeles and Chicago.

² The term “Consolidated Metropolitan Statistical Area” (CMSA) refers to the U.S. Office of Management and Budget’s definitions of metropolitan areas. Two or more Primary Metropolitan Statistical Areas (PMSAs) combine to form a CMSA. Six PMSAs comprise the San Francisco Bay Area CMSA, including: San Francisco PMSA, Oakland, PMSA, San Jose PMSA, Santa Rosa-Petaluma PMSA, Vallejo-Fairfield-Napa PMSA and the Santa Cruz PMSA. For more information of metropolitan area definitions, visit the Census Bureau’s web site at: <http://www.census.gov/population/www/estimates/aboutmetro.html>

J. Population Characteristics by Population Density Levels (Appendix Tables D.1 – D.5)

Appendix D analyzes San Francisco Bay Area population characteristics by population density levels. Population density, as used in this analysis, is total population divided by total land area in square miles, measured for each of the 4,422 block groups in the Bay Area.

The population density ranges are based on Geographic Information System (GIS)-based analyses of the data distribution, on Census Bureau and Office of Management and Budget (OMB) guidelines for establishing urbanized areas, and research by other urban geographers. The 500 and 1,000 persons per square mile levels are based on OMB guidelines for establishing urbanized areas. The 10,000 and 20,000 persons per square mile are based on urban geography research. The density category labels – rural, rural-suburban, suburban, urban and urban core – are arbitrary and are for illustrative purposes.

The following table summarizes the population density groups:

Bay Area Year 2000 Population and Land Area by Population Density Levels

Population Density Category	Population Density Range	Total Land Area (sq. mi.)	Share of Regional Land Area	Total Population	Share of Regional Total Population
Rural	< 500 persons/sq. mi.	5,569.5	80.5%	369,523	5.4%
Rural-Suburban	500 to 1,000 persons/sq. mi.	305.2	4.4%	222,584	3.3%
Suburban	1,000 to 10,000 persons/sq. mi.	897.0	13.0%	3,647,552	53.8%
Urban	10,000 to 20,000 persons/sq. mi.	119.4	1.7%	1,596,294	23.5%
Urban Core	> 20,000 persons/sq. mi.	31.6	0.5%	947,807	14.0%
TOTAL		6,922.6	100.0%	6,783,760	100.0%

The rural portion of the San Francisco Bay Area comprises over 80 percent of the land area in the region compared to just over 5 percent of the total population. Bay Area suburbs comprise 13 percent of the land area and nearly 54 percent of the region's total population. And the urban core of the Bay Area is just 0.5 percent of the land area and 14 percent of the region's population.

Appendix Tables D.1 through D.5 summarizes these characteristics at the county level and by race/ethnicity.

In terms of share of total land area, San Francisco is the least rural Bay Area county, with just 8.4 percent of San Francisco block groups with a population density less than 500 persons per square mile (Table D.1.) Napa County is the most rural county with 94.2 percent of Napa classified as rural. Contra Costa County has the highest share of land area (27.0 percent) classified as suburban. And over 37 percent of San Francisco's land area can be classified as urban core.

In terms of share of total population by density level, Sonoma County has the highest share at the lowest density levels with 23.6 percent of Sonoma population residing in rural neighborhoods. Napa County is the second most rural county, with 19.3 percent of Napa population residing in low density areas. San Francisco is the most urban county, with nearly 73 percent of San Francisco population residing in urban core neighborhoods. The second most urban Bay Area county is Alameda, with 12.1 percent of Alameda County's population residing in urban core neighborhoods and 35.1 percent in urban neighborhoods.

Marin could be considered the most suburban Bay Area county, with 76 percent of Marin County population residing in neighborhoods of suburban density (1,000 to 10,000 persons per square mile.) Other counties with high suburban population shares include Solano (74.2 percent), Contra Costa (73.2 percent) and Sonoma (65.0 percent). The least suburban counties are San Francisco (6.1 percent of population in suburban density neighborhoods), Alameda (48.8 percent), San Mateo (50.9 percent) and Santa Clara (58.6 percent of population in suburban areas).

The Bay Area's regional total population by race/ethnicity by the five population density categories is summarized in Table D.2. In rural through suburban Bay Area neighborhoods, white/non-Hispanic persons are a majority of the population, ranging from 59 percent white/non-Hispanic in suburban neighborhoods to 70 percent white/non-Hispanic in rural neighborhoods. The white/non-Hispanic population are in the minority in Bay Area urban and urban core neighborhoods.

The black/African American share of total population ranges from a low of 3.4 percent of Bay Area rural neighborhoods to 11.7 percent of Bay Area urban neighborhoods. The black/African American share dips to 9.5 percent in Bay Area urban core neighborhoods.

The Asian share of total population ranges from a low of 8.5 percent in Bay Area rural areas to 28.3 percent of total population in the Bay Area urban core.

The Hispanic/Latino share of total population also tends to increase with increasing population density levels, ranging from a low of 12.9 percent in rural-suburban areas to 27.5 percent in urban neighborhoods.

The American Indian / Alaskan Native share of total population follows the reverse trend, i.e., decreasing shares with increasing population density. These shares range from 0.5 percent of rural neighborhoods down to 0.3 percent of urban core neighborhoods.

County-level tables of total population by race/ethnicity by population density level are shown in Table D.3, while the share of county population by race/ethnicity by population density level is provided in Table D.4. This pair of tables may be useful to county analysts interested in understanding and describing race/ethnicity and population density characteristics in their county of interest.

Finally, Table D.5 shows the mean and median population density levels by race/ethnic group. The mean population density ranges from a low of 8,944 persons per square mile for white/non-Hispanic persons to 14,585 persons per square mile for the Bay Area's Asian population. The median population density ranges from 6,232 persons per square mile for the white/non-Hispanic

population to a high of 11,470 persons per square mile for the Bay Area black/African American population.

K. Superdistrict-Level Tables (Appendix Tables E.1 – E.2)

The term “superdistrict” refers to MTC sub-county aggregations of travel analysis zones used in MTC transportation analyses. Travel analysis zones are small areas defined by MTC for use in transportation planning analysis, and are similar in size to census tracts and block groups. The “34 superdistrict” system is used in weighting and reporting MTC household travel surveys, adjusting and calibrating MTC travel demand models, and reporting demographic forecasts, census data and MTC travel demand forecasts.

Total population by race/ethnicity by the MTC 34 superdistricts is included in Appendix Table E.1. Share of total population is included in Table E.2. The superdistricts range in population from 37,200 persons in superdistrict #28 (northern Napa County) to 454,400 persons in superdistrict #18 (Oakland and Alameda in Alameda County).

The white/non-Hispanic population shares range from 32.9 percent of San Francisco’s Mission District superdistrict #3 to 82.5 percent of southern Marin County (superdistrict #34). The Asian share of total population ranges from 1.3 percent of northern Sonoma County (superdistrict #31) to 44.7 percent of the Sunset District superdistrict #4 in San Francisco.

Black/African American share of total population by MTC superdistrict ranges from 0.5 percent of northern Sonoma County (#31) to 29.6 percent of Oakland/Alameda (#18). Hispanic/Latino share of total population ranges from 5.1 percent of Walnut Creek/Lamorinda (#22) to 40.0 percent of central San Jose (#11).

Northern Sonoma County (#31) has the highest share of American Indian/Alaskan Native population at 1.0 percent. In terms of Hawaiian / Pacific Islander population, superdistrict #7 (Redwood City/Menlo Park/East Palo Alto) has the highest share, at 1.7 percent.

V. DATA AVAILABILITY AND CONTACT INFORMATION

This data summary was written in Microsoft WORD, version 2000. The data tables are in Microsoft EXCEL workbooks, also version 2000. These WORD and EXCEL files are available for downloading from MTC's Internet site. Point your Web browser to:

<ftp://ftp.abag.ca.gov/pub/mtc/census2000/datasummary/>

The general Census 2000 Internet site maintained by MTC and the Association of Bay Area Governments (ABAG) is available at:

<http://www.census.mtc.ca.gov/> or
<http://www.census.abag.ca.gov/>

These sites will be updated to include various maps, databases, profile summary reports and other items of interest to the census data user.

The data user may also want to investigate the Census Bureau's American FactFinder to find other detailed Census 2000 results. The user should point their Web browser to the following Web site:

<http://factfinder.census.gov/>

For more information on this data summary or other Census 2000 issues or to request an older version of this WORD document or EXCEL workbooks, please contact the report author, Chuck Purvis, at 510-464-7731, or e-mail: cpurvis@mtc.ca.gov.

VI. ENDNOTES

i The "diversity index" included in this data summary is an "entropy index." We first came across this measure in the book by Cal State Northridge geographers James Allen and Gene Turner, "The Ethnic Quilt: Population Diversity in Southern California" (1997). Allen and Turner use the entropy index discussed by Michael White in the article "Segregation and Diversity Measure in Population Distribution," in "Population Index" 52:2, Summer, 1986, pp. 198-221.

The diversity index included in this data summary is based on five racial/ethnic categories: white; black or African American; Asian or Pacific Islander; Hispanic/Latino; and other races (American Indian, Alaskan Native, some other race, and two-or-more race.)

First, calculate the proportion in each of the five groups. A perfectly diverse community would have 20% in each group, or a proportion of 0.20.

Multiply the proportion by the natural logarithm of that proportion. For example, if the proportion is 0.15, then $0.15 * \ln(0.15)$ is -0.284567.

Note that the natural log of zero is undefined, so you would need to catch this in a conditional statement in Excel: $A2=\text{if}(A1=0,0,A1*\ln(A1))$. (If proportion in A1 is zero, then zero, else multiply A1 by the natural log of A1.)

Sum these products up. An example is:

15% white = $0.15 * \ln(0.15) = -.28457$
25% black = $0.25 * \ln(0.25) = -.34657$
30% Hispanic = $0.30 * \ln(0.30) = -.36119$

25% Asian/PI = $0.25 * \ln(0.25) = -0.34657$
5% other = $0.05 * \ln(0.05) = -0.14979$
sum = -1.48869

Now, divide this sum by -1.609. For this example, a diversity index of 0.925 is calculated.

The -1.609 denominator is based on $5 * 0.20 * \ln(0.20)$.

A diversity index denominator based on *seven* categories would be:
 $7 * 0.14286 * \ln(0.14286) = -1.9459$

There are other measures of diversity, but this measure is preferable because it ranges from an index of 0.0 (100 percent in one race category) to 1.0 (equal share among all groups.)

ii Census Designated Places (CDPs) - Census 2000 Criteria

Census designated places (CDPs) are closely settled, named, unincorporated communities that generally contain a mixture of residential, commercial and retail areas similar to those found in incorporated places of similar sizes. The Census Bureau works with local participants to delineate boundaries for CDPs. By defining CDPs, the Census Bureau can tabulate and disseminate data for localities that otherwise would not be identified as places in the decennial census data products.

Each CDP will contain an identifiable core encompassing the area that is associated strongly with the CDP name and contains the majority of the CDP's population, housing, commercial structures and economic activity. A CDP must comprise a reasonably compact and continuous land area internally accessible to all points by road except where parts of a CDP are separated by a narrow corridor of incorporated territory, or where the topography or geographic patterns of settlement are not compact, but are irregularly shaped. A CDP may not be located partially or entirely within an incorporated place or another CDP. A CDP encompasses the surrounding closely settled territory associated with the place name. The Census Bureau does not intend for a CDP to be an apartment complex or residential subdivision in densely settled areas or simply a crossroads in rural areas.

There are no minimum or maximum population thresholds for recognition as a CDP. This represents a substantial change from all prior CDP criteria.

For more information about the Census Designated Place Program, please see the Notice of Final Program: Federal Register, (August 22, 1997).

Accessed from the Census Bureau's Web site 9/22/01: <http://www.census.gov/geo/www/psapage.html>

Table 1**Total Population by Race/Ethnicity in the United States, California, and San Francisco Bay Area
Census 2000*****Total Population by Race/Ethnicity***

	United States	California	San Francisco Bay Area	Bay Area as Share of US
<i>Non-Hispanic</i>				
White, alone	194,552,774	15,816,790	3,392,204	1.7%

Table 6

Racial/Ethnic Diversity in the San Francisco Bay Area, 1980-2000

County	1980	1990	2000
Alameda	0.682	0.767	0.889
Contra Costa	0.502	0.603	0.757
Marin	0.284	0.374	0.485
Napa	0.315	0.399	0.534
San Francisco	0.760	0.780	0.818
San Mateo	0.572	0.676	0.775
Santa Clara	0.555	0.678	0.786
Solano	0.604	0.703	0.844
Sonoma	0.284	0.363	0.504
Bay Area	0.605	0.694	0.809

The diversity index is based on the use of an "entropy index" that measures diversity in a population. This diversity, or "entropy" index ranges from 0.0 to 1.0.

Values approaching 1.0 imply the most diversity, that is, all groups are equally represented.

Values approaching 0.0 imply the least diversity, that is, only one group is represented.

Table D.5
Mean and Median Population Density by Race/Ethnicity
San Francisco Bay Area, Census 2000

Race/Ethnicity	Mean Population Density (Persons/Sq. Mile)	Median Population Density (Persons/Sq. Mile)
White alone, non-Hispanic	8,944	6,232
Black/African American alone, non-Hispanic	14,375	11,470
Asian alone, non-Hispanic	14,585	10,079
American Indian or Alaskan Native alone, non-Hispanic	11,261	7,519
Native Hawaiian or Pacific Islander alone, non-Hispanic	12,574	10,225
Some other race alone, non-Hispanic	12,789	8,692
Two or more races, non-Hispanic	11,335	8,023
Hispanic or Latino, any race	13,517	10,260
Total	11,407	7,837

Note: These median and mean density calculations are weighted on total population by race. They are significantly higher than traditional density measures, which are weighted on land area. A land area-weighted density measure for the Bay Area is 6,783,760 persons divided by 6,922.57 square miles, or a mean density of 979.95 persons per square mile.

The median density measure can be expressed as one-half of the Bay Area population living below, and one-half above this density level.
